

OPEN VACANCY

OUR PROJECT

Our mission at Innovived is to bring biology and technology together. We aim to establish and contribute to innovative projects within the field of biomedical engineering and to organize events that focus on knowledge transfer to future scientists. We believe that by creating a bridge between biology and technology, applications with great potential are made possible. The main focus during the coming year(s) lies on creating innovative applications in the life sciences sector with the aid of 3D printing technologies on the one hand and the organisation of educational STEM activities for pupils on the other hand.

THE FUNCTION

Within our team you have a wide array of possibilities, whether you like it more technical or want to be the person responsible for our organizational and/or communicational affairs. Because of the interdisciplinarity of our team, there is something out there for everyone! Not only do you have the opportunity to work on one of our currently running projects, you will also be able to pursue your own ones as long as they are aligned with the vision of Innovived. If you would like more information or are still unsure of how you would fit within our team, you can always contact us for more information via info@innovived.com.
